

Trends and Strategies in Logistics

**Defining the “New Normal”:
Logistics Lessons Learned from the Second Wave of COVID19**

Online Workshop

18th February 2021, 9:30 – 12:15 (German Time)

The Coronavirus is putting international logistics networks to the test. As severe as the impacts of the global pandemic might be, it is also acting as a burning glass for logistics networks and reveals problems that often existed before. While most supply chains have been relatively quick in reacting to the first wave of COVID19, it is still highly uncertain how logistics networks will develop in the future due to the COVID19 pandemic. Therefore, a cross-industry exchange on good practices and future solutions is still necessary.

The Competence Center for International Logistics Networks at the Berlin University of Technology seeks to continue the discussion on the impact of the Coronavirus on international logistics networks. The goal of this workshop is to condense logistics lessons-learned from the second wave of COVID19 in order to prepare your business for an uncertain future. Speakers from the industry and academia will present their solutions and the whole group will jointly discuss future directions of international logistics networks.

Agenda | 18th February 2021 | 09:30 -12:15 (German Time)

09:30 – 09:50	Welcome, self-introduction participants and target of the session
09:50 – 10:10	Introduction to topic and insights from previous COVID-workshops
10:10 – 10:40	Presentation of current solutions in practice <ul style="list-style-type: none">• Two participants present their approaches and lessons learned
10:40 – 11:40	Joint discussion of logistics lessons learned from second wave of COVID19 <ul style="list-style-type: none">• Successful measures and insights in tackling the second wave, assumptions of future changes in logistics networks
11:40 – 12:00	Presentation of results of the discussion
12:00 – 12:15	Wrap-up, summary and outlook

Language: English

Registration

Please send an e-mail with your name, company and occupation to Dr. Benjamin Nitsche (nitsche@logistik.tu-berlin.de, +49 30 31426007) before 7th February 2021.

The discussion will be conducted via Zoom. Dial-in information will be sent in advance to registered participants.

Prof. Dr.-Ing. Frank Straube
Head of Chair of Logistics

COMPETENCE CENTER
International Logistics Networks

Technische
Universität
Berlin

The Project

- The online discussion is organized by the **Competence Center for International Logistics Networks, funded by the Kuehne Foundation**.
- The Competence Center aims at supporting businesses in exchanging strategies across industries and in strategically managing their international supply chains.
- From 2013 to 2021 cross-industry industry workshops have been held in Germany at the Technische Universität Berlin, in China at the Tongji University Shanghai as well as in Addis Ababa, Ethiopia.

Your Benefits

- **Free participation** in the discussion.
- You have the chance to exchange **approaches and best practices** from different industries, expand your **professional network** and attend **future discussions**

Our Contribution

- We will provide you with a **platform to exchange on current approaches in logistics** to tackle COVID19
- We will provide you with **latest findings and results** of the project related to the topic of discussion

Your Contribution

- You are ready to get involved in discussions about solutions of current and future challenges in international logistics networks.
- You are willing to participate in **one online survey before and one after the online discussion**. Each survey should not take more that 10-15 minutes.
