

## Bachelor/Master thesis

### Description:

In sub-saharan Africa more and more people move into urban areas. As a result, urbanization and thus urban logistics is a big topic. At the same time, making sure that further development is sustainable becomes increasingly important. Research towards urban logistics, towards sustainability, and towards sustainable urban logistics, especially on the African continent and in sub-saharan Africa, but also outside of the continent, is necessary.

### Objectives:

- Research topics related to urban logistics in sub-saharan Africa, but also outside of sub-saharan Africa.
- Research topics related to sustainability in sub-saharan Africa, but also outside of sub-saharan Africa.
- Research topics related to sustainable urban logistics in sub-saharan Africa, but also outside of sub-saharan Africa.

### Requirements:

- High degree of independence and motivation
- At least excellent communication and writing skills in either English or German
